

Polymer

RR Consumables

Coating Polymers

Rhino Research offers you the full range of coating polymers

From ready to use products (high end, agro, shiny, pearl, basic, high coverage..) to all basic ingredients (binder/polymer, fillers, color pigments, de-foaming agents, emulsifiers...).

We can also offer other additives such as growth promoters, technical markers, and tracers, QuantiMark, Systemic markers and much more.

Key Benefits

- Easily mixed with water
- Excellent adherence to seed coating materials
- Non hazardous
- Wide variety of color available
- Custom colors available

General information

- Mix colors with initial application of RR polymer to ensure even application to seed
- Keep away from direct sunlight
- Protect from freezing
- Contents may settle, shake containers before using
- Keep container closed when not in use
